

Project Development Phase

Date	04 November 2022
Team ID	PNT2022TMID48518
Project Name	Project – Visualizing and Predicting Heart Diseases with an Interactive Dashboard

Sprint-2

Profile- To Know the User about Him/Her Information and provide to Generate the Report for his Analysis

The image displays two screenshots of the IBM-Heart Dashboard, specifically the Profile page. The top screenshot shows the profile header with a heart rate graphic and a 'Name' field. The bottom screenshot shows the 'Profile Information' section with fields for Full Name, Mobile, Email, Location, Gender, Age, Blood Group, and Social media links, along with a 'GENERATE AS REPORT' button.

About this file

This dataset consists of features that can be used to predict which patients have a high risk of heart disease.

Attribute Information:

```
13 #51 (thal) --> 0 = normal; 1 = fixed and
    2 = i sodalse<a s« be j epz ed<hs,..i<h adumm;. 'aieo
4 sex: sex (1 = male; 0 = female)
5 painloc: chest pain location (1 = substernal; 0 = otherwise)
' eesH= elie>edaCe ek?=skew e
--Value 1: typical angina
--Value 2: atypical angina
--Value 4: a n/sma|
```
